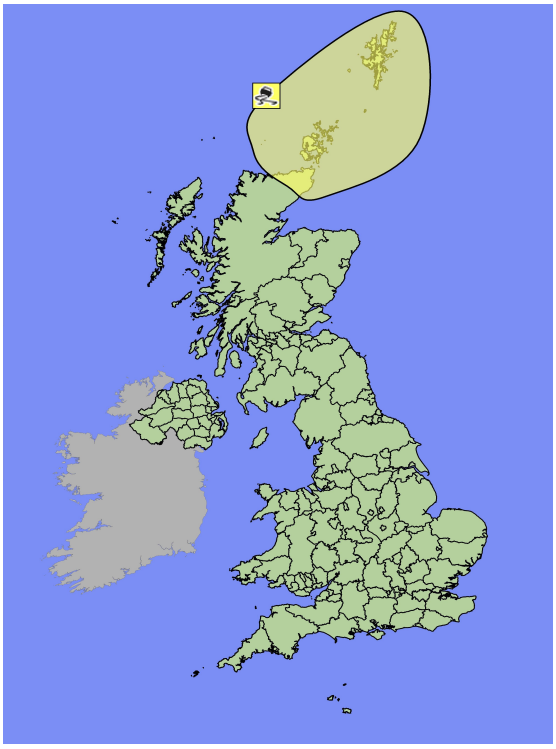
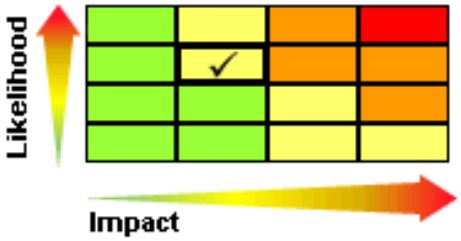
National Severe Weather Warning Service





Chief Forecasters Assessment
A weak frontal system will move southwards into the extreme north of Scotland overnight and into Wednesday morning. This will bring showers consisting of an increasingly wintry mix, giving an enhanced risk of ice as they fall onto frozen surfaces. A slight covering of snow is likely across Shetland.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **17:00 on Tue, 11th Dec 2012** until **11:00 on Wed, 12th Dec 2012**

Scattered showers will affect the Northern Isles and northeast Caithness through this evening and into Wednesday morning, these turning wintry across Shetland towards midnight and over the northeast of the mainland by morning. The public should be aware of an increased risk of ice on untreated surfaces.
